

Ghassan Ahmed

Senior Full-Stack Laravel Engineer

Jabalya, Gaza, Palestine | gssan1018@gmail.com | +970 56 771 1720

LinkedIn: [linkedin.com/in/ghassan-ahmed-272390254](https://www.linkedin.com/in/ghassan-ahmed-272390254)

PROFESSIONAL SUMMARY

Senior Laravel engineer with 5+ years of experience architecting backend systems, RESTful APIs, and admin platforms for government, human-rights, and tech-enabled-talent products across Palestine and the Gulf. Skilled in owning systems end-to-end — schema design, role-based access control (RBAC), real-time pipelines, integrations, and deployment. Track record on national-scale platforms including the Palestinian Central Bureau of Statistics, the Ministry of Agriculture, and Saudi Arabia's Human Rights Commission. Available for remote engagements; bilingual delivery in Arabic and English.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Laravel Engineer — TAQAT Palestine Business Incubator *January 2023 — Present*
Gaza, Palestine

- Lead backend engineer on multiple production platforms across government, civic-tech, and BrightGaza flagship products — including PalAI.network and ArabTalents.org.
- Architected Laravel and MySQL systems with role-based access control, RESTful APIs, and analytics dashboards serving thousands of daily users in Arabic (RTL) and English.
- Built CMS and admin platforms for the Palestinian Ministry of Agriculture and Saudi Arabia's Human Rights Commission — including employee management, warehouse tracking, and reporting.
- Owned secure authentication, API design, and integration workflows across multi-tenant deployments; collaborated with frontend, design, and product teams on feature delivery.

Freelance Software Developer — Danat Company *April 2022 — May 2024*
Contract / Part-time

- Designed and shipped a real-time lead-prioritization pipeline using WebSocket, reducing sales-team response latency on hot leads.
- Built five product landing pages end-to-end: wireframes, mockups, and responsive Laravel and JavaScript implementations.
- Integrated RESTful APIs across internal applications and tuned system performance for backend-heavy workloads.

Software Developer — Shift Company *November 2020 — February 2022*
Gaza, Palestine

- Improved site performance and user experience by approximately 83 percent in collaboration with the design team.
- Contributed to website planning and research workflows, saving the team an estimated 400+ working hours.
- Maintained QA sheets across design and project management for delivery quality control.

FEATURED PROJECTS

PalAI.network — Palestinian AI-Enabled Talent Platformpalai.network

Backend engineering on the certification and talent-verification platform connecting Palestinian AI-ready engineers with global employers. Worked on profile validation flows, certification pipelines, and admin tooling for talent discovery.

Tech: Laravel, MySQL, REST APIs, RBAC

ArabTalents — Regional Freelance Marketplacearabtalents.org

Core backend modules for a bilingual (Arabic/English) freelance platform: gig lifecycle, bidding, role-based dashboards for clients, freelancers, and admins, moderation tooling, and reporting.

Tech: Laravel, MySQL, Blade, REST APIs, RTL/i18n

Palestinian Central Bureau of Statistics — National Statistics Portalpcbs.gov.ps

Contributed backend modules and dashboards for Palestine's national statistics portal — content management, bilingual data publication workflows, and Arabic (RTL) and English ready interfaces.

Tech: Laravel, MySQL, CMS, Bilingual / RTL

Agricultural Risk Mitigation Fund — Palestinian Ministry of Agriculturepadrrif.moa.pna.ps

Full CMS for employee management, warehouse tracking, attendance, and reporting. Implemented role-based access control and advanced analytics dashboards for ministry operations.

Tech: Laravel, MySQL, RBAC, Analytics

Human Rights Commission, Saudi Arabia — E-Services Portale-services.hrc.gov.sa

Built RESTful APIs, frontend layouts (HTML/CSS/JavaScript), and maintained the secure Laravel backend for the e-services portal serving Saudi Arabia's Human Rights Commission.

Tech: Laravel, REST APIs, Secure Authentication, Frontend

Euro-Mediterranean Human Rights Monitor — Dashboards & Reportingeuromedmonitor.org

Dynamic dashboards and reporting systems with Laravel backend integration for one of the region's most-cited human-rights organizations.

Tech: Laravel, Dashboards, Reporting

Palestinian Bar Association — Legal Trainee Platformpalestinebar.ps

Responsive web pages and backend modules for legal trainees using Laravel and Material UI.

Tech: Laravel, Material UI, Responsive Design

Al Fowzan and Mioon Fashion — E-commerce Platformsalfowzan.com

Two end-to-end e-commerce platforms (Laravel and MySQL): product, order, and customer admin; secure checkout; and Blade-driven responsive storefronts.

Tech: Laravel, MySQL, Blade, Payments

TECHNICAL SKILLS

Backend Development: Laravel, PHP, MySQL, RESTful APIs, MVC, WebSocket, Authentication, Role-Based Access Control (RBAC), CMS Development

Frontend: JavaScript, jQuery, Blade, HTML5, CSS3, Bootstrap, Material UI, Responsive Design

Tools and Workflow: Git, GitHub, Postman, Linux, Deployment Workflows, Code Review, Agile Collaboration

Practices: System Architecture, API Design, Performance Tuning, Secure Coding, Bilingual / RTL Delivery
