Ghassan Ahmed

Senior Backend Engineer | Software Architecture and Systems Assessment

Gaza, Palestine (Remote) | gssan1018@gmail.com | +970 56 771 1720 | linkedin.com/in/ghassan-ahmed-272390254 | ghassan-ahmed.vercel.app

PROFESSIONAL SUMMARY

Senior backend engineer with 6+ years of experience designing, building, and reviewing production systems: architecture, databases, REST APIs, third-party integrations, and the business workflows behind them. Lead engineer on BrightGaza, a freelance marketplace connecting companies with vetted talent (12,500+ members, 3,200+ delivered projects, $480K+ in secure payments), including contracts, payments, and role-based management of clients, freelancers, and admins. Built client and employee management systems, real-time workflow automation, and secure API integrations for government and commercial clients in Palestine and Saudi Arabia. Comfortable reading and evaluating existing codebases, surfacing technical debt and missing requirements, and scoping work into phased delivery plans.

CORE EXPERTISE

System Architecture Review, Source Code Analysis, Backend Architecture, Database Design, REST API Design, Third-Party Integrations, CRM and Client Management, Employee Management Systems, Workflow Automation, Business Rules, Role-Based Access Control (RBAC), Multi-Tenant Systems, Technical Debt Assessment, Requirements Gap Analysis, Effort Estimation, Technical Documentation

TECHNICAL SKILLS

Backend: Laravel, PHP, Node.js, RESTful API Design, WebSockets, Authentication and Authorization, Role-Based Access Control (RBAC), MVC, CMS Development

Databases: MySQL, Relational Data Modeling, Schema Design, Performance Tuning

Architecture: System Architecture, Multi-Tenant Systems, Secure Coding, Code Review, Performance Optimization

Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Tailwind CSS, Internationalization (i18n) and RTL

Tools and Workflow: Git, GitHub, Postman, Linux, Vercel, Deployment Pipelines, Agile

PROFESSIONAL EXPERIENCE

Senior Software Engineer, TAQAT Palestine Business Incubator — Jan 2023 – Present

Gaza, Palestine

- Lead engineer on BrightGaza (brightgaza.com), a freelance marketplace connecting global companies with vetted Palestinian talent; the platform serves 12,500+ members with 3,200+ projects delivered and $480K+ in secure payments.
- Designed backend workflows and business rules for the full engagement lifecycle: job posting, proposals, contracts, payments and billing, ratings, and reviews.
- Architected client, freelancer, and admin management modules with role-based access control, analytics dashboards, and reporting, serving thousands of daily users in Arabic and English across PalAI.network and ArabTalents.org.
- Built back-office systems for the Palestinian Ministry of Agriculture and Saudi Arabia's Human Rights Commission covering employee management, warehouse tracking, attendance, and reporting.
- Owned authentication, REST API design, and third-party integrations across multi-tenant deployments; reviewed code and scoped features with design and product teams from planning through release.

Software Engineer (Freelance), Danat Company — Apr 2022 – May 2024

Remote, Contract

- Designed and shipped a real-time lead-prioritization pipeline over WebSockets that ranks incoming sales leads, cutting response time on high-intent leads.
- Integrated RESTful APIs across internal applications and tuned performance for backend-heavy workloads.
- Delivered five product landing pages end to end, from wireframes to responsive implementations.

Software Developer, Shift Company — Nov 2020 – Feb 2022

Gaza, Palestine

- Improved site performance and user experience by approximately 83% in collaboration with the design team.
- Streamlined website planning and research workflows, saving the team an estimated 400+ working hours.
- Maintained QA checklists across design and project management to keep delivery quality consistent.

SELECTED PROJECTS

Agricultural Risk Mitigation Fund, Palestinian Ministry of Agriculture — padrrif.moa.pna.ps

Full back-office system for employee management, warehouse tracking, attendance, and reporting, with RBAC and analytics dashboards.

Tech: Laravel, MySQL, RBAC, Analytics.

ArabTalents, Bilingual Freelance Marketplace arabtalents.org
Gig lifecycle and bidding workflows, role-based dashboards for clients, freelancers, and admins, moderation tooling, and reporting. Tech: Laravel, MySQL, REST APIs, i18n/RTL.

Human Rights Commission, Saudi Arabia, E-Services Portal e-services.hrc.gov.sa
Maintained the secure backend of an existing production portal and extended it with RESTful APIs and front-end layouts. Tech: Laravel, REST APIs, Secure Authentication.

PalAI.network, AI Talent Verification Platform palai.network
Backend lead for certification and talent-verification workflows: profile validation, certification pipelines, and admin tooling. Tech: Laravel, MySQL, REST APIs, RBAC.

Palestinian Central Bureau of Statistics, National Statistics Portal pcbs.gov.ps
Backend modules and dashboards for content management and bilingual data-publication workflows. Tech: Laravel, MySQL, CMS.

Qareeb, Delivery Platform qareeb.ps
Designed and built from zero: ordering workflow, phone OTP authentication, and an operations dashboard; bilingual progressive web app. Tech: Next.js, React, PWA, Vercel.

Additional: Euro-Mediterranean Human Rights Monitor (dashboards and reporting), Palestinian Bar Association (legal-trainee platform), Al Fowzan and Mioon Fashion (two e-commerce platforms with secure checkout).

EDUCATION

B.Sc. in Computer Systems Engineering, Palestine Technical College 2020
GPA: 80.4

CERTIFICATIONS

- Small Project Management, USAID (U.S. Embassy supervision), 2020
- Innovation in Government Work, Mohammed Bin Rashid Centre for Government Innovation (MBRCGI)
- Search Engine Optimization (SEO), Google
- Cybersecurity Fundamentals; Introduction to Cybersecurity; Introduction to Networks; System Protection from Hacking, Edraak
